

Issue 29: Spring 2019

The jobs of the Future

Talking about the jobs of the future has become fashionable. What will a white-collar professional look like? For many years now, researches have been predicting that new technologies, constantly evolving, will be incorporated into our daily lives to the extent that they will substantially change the way we work.

Blue Innovation

The box is now a “Smart Box”

The world of transport is no stranger to the continuous advances in tracking technologies. Since the invention of the global positioning systems and their implementation in the transport sector in the '90s, the need to monitor the placement of individual containers during a shipment has become more common.
