Port Communities: “If you want to walk far, walk together”

In the development of port-logistic communities this is no exception. Some port communities in the Mediterranean have considered that, in order to address their strategic objectives, they need a trained and talented community. To this end, it is necessary to coordinate forces to make the port an attractive place to work. The involvement of companies and administrations is needed to create quality employment.

A video thumbnail with the text '#DID YOU KNOW?' in large, bold, white letters on a blue background. Below it, it says 'The Cold Chain: Cooling Technologies'. There are also logos for 'Escola Europea Intermodal Transport' and 'Webinar Animaker'.

#DidYouKnow

This month we looked at the cold chain, and the cooling technologies. New technologies in reefer transport and logistics have made it possible for the market of cold chain products to expand. Our latest #DidYouKnow video focuses on the Cooling Technologies.

Blue Innovation

Digital Training in the 21st century

The Escola has always believed in the experiential teaching model – explain the

theory of the transport operations to the students whilst simultaneously taking them to the places where the operations themselves take place. This was made possible through the signature MOST and SURCO courses. In 2021, through the EU-financed project YEP MED (Youth Employment in the Ports of the MEditerranean), a new training methodology morphed into existence – one that incorporated cyberspace with our own reality: Simulated Practice Enterprises.
